

Global eLearning Solutions

FORMARE®

FORMARE® is an open, flexible and global eLearning and bLearning solution that provides educational environments for both collaborative and self-learning.

FORMARE® development is supported by innovative technology which makes this platform pedagogically oriented to the efficient acquisition and dissemination of knowledge.

eLearning components

Main Benefits

Common to all platforms of eLearning and bLearning

- Cost Reduction
- Contents
- IT Training
- Information Dissemination

FORMARE® Specific

- In Portuguese
- Parameterisable
- Synchronous and Asynchronous Services
- Flexibility of eLearning management
- Intuitive Interaction
- Pedagogical Results
- Data control and registration

The implementation of a FORMARE® based on eLearning service brings in a wide range of benefits to the Human Resources Management process in organisational context.

FORMARE® offers its partners the possibility of creating and managing their own eLearning and bLearning environment, in either hosting or housing modes, highlighting usage aspects like:

- identity profile
- marketing and image
- training offer
- students
- teachers
- course announcements

Main Functionalities

Administrative Management

Management of eLearning and bLearning training events (catalogue, training programme, participants, trainers, coordinators, thematic areas);

Pedagogic Management

Management of self-learning and collaborative learning (tutorials, questionnaires, individual and group work, pedagogic resources);

Communication and Interaction

Synchronous communication (text audio or video chat), Collaborative Work (application sharing and online presentations). Asynchronous communication (e-mail, themed forums, file exchange);

Content Availability

Creation, import, offer, standardisation and management of contents in the LMS;

Evaluation

Pedagogic evaluation, progress evaluation and evaluation of training efficiency with the capacity for both continuous and final evaluation;

Integration and Parameterisation

Integration with external information systems, data security and confidentiality, custom parameterisation, by LMS, of the training environment and of the reports and indicators by centre, by course, by class and by trainee.

CONTENT STANDARDISATION

FORMARE® was the first Portuguese platform to satisfy in full the specifications of the SCORM 1.2 (Sharable Contents Object Resource Module), and has been recognised as SCORM Adopter / ADL Partner, by ADL (Advanced Distributed Learning).

FORMARE® is a registered trademark of Portugal Telecom Inovação, SA.
